

Do Anh Nghia

+84 7988 760 74 | Ho Chi Minh City, Vietnam | anhnghia9a633@gmail.com | do-anh-nghia-uiux-portfolio.vercel.app

Product Designer · UI/UX · Design-to-Code with 1+ year of professional experience across agency and product teams, focused on decision-heavy journeys, interaction states, responsive systems and developer-ready handoff.

EXPERIENCE

UI/UX Designer MangoAds — SEO Optimization & Web Design Agency	May 2026 — Sep 2026 <i>Full-time</i>
• Led UI/UX redesign and IA across 8+ client-facing web platforms, standardizing reusable components, responsive rules and handoff.	
UI/UX Designer Tikera Technology & Brand Development	Dec 2025 — Apr 2026 <i>Full-time</i>
• Structured user flows, wireframes and design systems for 15+ product journeys, including loading, empty, error and edge-case states.	
Intern UI/UX Designer Trésor Solution Company	Sep 2025 — Dec 2025 <i>Remote</i>
• Partnered with engineers on responsive product flows, reusable UI patterns and design-to-code specifications for MVP builds.	

SELECTED PRODUCT WORK

Product Design · Commerce UX , LuxRoom — Furniture E-commerce (do-anh-nghia-uiux-portfolio.vercel.app/case-study-luxroom.html)	2026
• Problem: Premium imagery creates desire but does not resolve room fit, dimensions, materials, access and delivery uncertainty. Outcome: Designed a continuous decision journey across discovery, comparison, saved configuration, cart and checkout, with explicit recovery when purchase confidence breaks down.	
Product Design · Financial Decision UX , Nova — Consumer Fintech (do-anh-nghia-uiux-portfolio.vercel.app/case-study-nova.html)	2026
• Problem: Balance alone does not show what is truly safe to spend after bills, savings goals and protected buffers. Outcome: Reframed the product around a forward-looking Money Horizon and iterated key decisions using 10 verified direct-user/self-report records across two rounds.	
Product Design · Operational Systems , Sentry — B2B Fraud Operations (do-anh-nghia-uiux-portfolio.vercel.app/case-study-sentry.html)	2026
• Problem: Fraud analysts make high-stakes decisions while evidence is fragmented across systems and difficult to reconstruct. Outcome: Unified alert priority, forensic evidence, decision controls, rationale and audit recovery in one investigation model with conflict, escalation and failure states.	
IA · Decision-support UX , VAS Education — Website Redesign (do-anh-nghia-uiux-portfolio.vercel.app/case-study-vas-education.html)	2026
• Problem: Families must compare programmes, campuses, student support and admissions without a clear path from exploration to action. Outcome: Restructured the experience from programme/campus discovery through decision support to admissions or visit requests within one responsive design system.	

EDUCATION & SKILLS

Education: University of Science — HCMUS, Information Technology (2021–2026) · Claude Bernard University Lyon 1, Information Technology (2021–2025) · Foundations of Google UX Design (2026).
Skills: Product strategy, IA & user flows, interaction/state design, design systems, responsive UI, research, usability testing, requirements and acceptance criteria. Design-to-code: Figma, HTML/CSS/JS, React/Next.js prototypes (AI-assisted), Git/GitHub, Playwright + axe-core. Workflow: UIUX Factory for repository grounding, implementation support, browser QA and evidence-aware iteration.
