### EXPERIENCE

#### MANGOADS — SEO OPTIMIZATION & WEB DESIGN AGENCY

Full-Time

UI/UX Designer

05/2026 – 09/2026

- Translate business requirements into IA, user flows, responsive UI systems and interaction states for client-facing web projects.
- **Outcome:** clearer content structures, more consistent interface patterns and implementation-ready handoff.

#### TIKERA TECHNOLOGY AND BRAND DEVELOPMENT COMPANY

Full-time

UI/UX Designer

12/2025 – 04/2026

- Designed user flows, wireframes and high-fidelity interfaces while defining interaction states and edge cases.
- **Outcome:** improved UI consistency and clearer implementation decisions.

#### TRÉSOR SOLUTION COMPANY

Remote

Intern UI/UX Designer

09/2025 – 12/2025

- Supported responsive product flows, reusable UI patterns and developer handoff.
- **Outcome:** clearer interaction models for product iterations.

### SELECTED PROJECT

#### [LuxRoom – Furniture E-Commerce Website](#)

- **Problem:** furniture shopping often looks premium but hides the practical information users need to evaluate fit, material, dimensions and delivery.
- **Solution:** structured the journey around room context - material preference - product evaluation - save / checkout.
- **Outcome:** built a responsive ecommerce prototype connecting contextual discovery, product specifications, Saved Room and checkout into one coherent experience.

#### [ATELIER – Fashion Ecommerce Website](#)

- **Problem:** editorial fashion experiences can create strong brand desire while making product discovery and purchase decisions harder.
- **Solution:** increased information density with user intent across discover → evaluate → buy, keeping editorial expression early and transactional clarity later.
- **Outcome:** implemented a mobile-first prototype covering collection discovery, product decisions, variants and checkout while preserving a consistent luxury visual language.

#### [VAS EDUCATION — Redesign Website](#)

- **Problem:** prospective families had access to extensive school information, but lacked a clear path through programs, campuses, student life and admissions.
- **Solution:** reorganized the experience around parent questions: trust → fit → daily reality → action.
- **Outcome:** created a responsive prototype connecting brand proof, learning pathways, campus context and admissions into a clearer decision journey.

#### [CAPITAL PLACE — Redesign Website](#)

- **Problem:** prospective families had access to extensive school information, but lacked a clear path through programs, campuses, student life and admissions.
- **Solution:** reorganized the experience around parent questions: trust → fit → daily reality → action.
- **Outcome:** created a responsive prototype connecting brand proof, learning pathways, campus context and admissions into a clearer decision journey.

## SUMMARY

Product Designer with 2+ year of professional experience across agency and product teams, owning the path from requirements and information architecture to interaction states, prototypes and developer handoff. Experience spans client-facing web platforms and independent product concepts across fintech, B2B, e-commerce and education.

## EXPERIENCE

### MANGOADS — SEO OPTIMIZATION & WEB DESIGN AGENCY Full-Time

UI/UX Designer 12/2026 – 09/2026

- Translate business requirements into IA, user flows, responsive UI systems and interaction states for client-facing web projects.
- **Outcome:** clearer content structures, more consistent interface patterns and implementation-ready handoff.

### TIKERA TECHNOLOGY AND BRAND DEVELOPMENT COMPANY Full-time

UI/UX Designer 01/2025 – 10/2025

- Designed user flows, wireframes and high-fidelity interfaces while defining interaction states and edge cases.
- **Outcome:** improved UI consistency and clearer implementation decisions.

### TRÉSOR SOLUTION COMPANY Remote

Intern UI/UX Designer 09/2024 – 12/2024

- Supported responsive product flows, reusable UI patterns and developer handoff.
- **Outcome:** clearer interaction models for product iterations.

## SELECTED PROJECT

### [LuxRoom](#) Furniture E-commerce

- **Problem:** High-consideration furniture purchases rely on premium imagery, but shoppers still lack decision-critical context around room fit, dimensions, materials, access and delivery
- **Outcome:** Designed an end-to-end decision journey that carries room context and product configuration across discovery, comparison, saved items, cart and checkout, with explicit recovery paths when fit or purchase confidence breaks down

### [Nova](#) Consumer Fintech

- **Problem:** A bank balance does not tell users what is actually safe to spend when upcoming bills, savings goals, protected buffers and unusual transactions compete for attention.
- **Outcome:** Reframed the experience around a forward-looking Money Horizon and consequence-aware financial decisions, then iterated key flows using 10 verified direct-user/self-report records across two research rounds without overstating production or usability impact.

### [Sentry](#) B2B Fraud Operations

- **Problem:** Fraud analysts must make high-stakes decisions while evidence is fragmented across multiple systems, increasing context switching and making fast actions difficult to justify or reconstruct.
- **Outcome:** Designed a unified investigation workspace that keeps alert priority, forensic evidence, decision controls, rationale and audit recovery in one operational model, including conflict, escalation and failure states around consequential actions.

### [VAS Education](#) Website Redesign

- **Problem:** Prospective families must evaluate programmes, campuses, student support and admissions across a large information space without a clear decision path from exploration to action.
- **Outcome:** Restructured the experience into a coherent education journey from programme and campus discovery through decision support to admissions or visit requests, while preserving one responsive design system across distinct page roles instead of duplicating layouts.

## EDUCATION

|                                  |             |

Ho Chi Minh City Portfolio  
LinkedIn

## EXPERIENCE

**MangoAds — SEO Optimization & Web Design Agency** 05/2026 – 09/2026

UI/UX Designer · Full-time

- Led UI/UX redesigns and information architecture across 8+ client-facing web platforms, standardising component architecture and responsive rules for direct developer handoff.
- Built and documented reusable Figma component patterns with interaction states to improve implementation consistency.

**Tikera Technology and Brand Development Company** 12/2025 – 04/2026

UI/UX Designer · Full-time

- Structured user flows, wireframes and design systems for 15+ product journeys, documenting edge cases and error states before development.
- Standardised UI patterns across the team to support more consistent design QA and implementation decisions.

**Trésor Solution Company** 09/2025 – 12/2025

Intern UI/UX Designer · Remote

- Partnered with engineers on responsive product flows and reusable UI patterns, setting design-to-code specifications for MVP builds.

## SELECTED WORK

**Nova — Consumer Fintech** Independent concept

Reframed personal finance around “what is safe to spend” after obligations and a protected buffer; made sensitive-action consequences and failure recovery explicit. Validated with 10 async self-report records over 2 rounds.

**Sentry — B2B Fraud Operations** Independent concept

Designed a dense investigation workspace that keeps alert context, forensic evidence, risky actions and recovery inside one stable model with roles, permissions and audit trail.

**LuxRoom — Furniture E-commerce** Independent concept

Carried room context, materials and dimensions into the buying decision, preserving the chosen variant through product detail → cart → checkout with a visible edit-configuration recovery path.

**VAS Education — Website Redesign** Independent redesign

Turned dense academic information into structured curriculum comparison and campus-tour booking, organised around parent questions: trust → fit → daily reality → action.

## SKILLS & TOOLS

**Product Design:** Product Strategy, IA & User Flows, Interaction & State Design, Design Systems, Responsive UI, User Research, Usability Testing

**Business Analysis:** Requirement Gathering, User Stories, Acceptance Criteria, Process Modeling, MVP Definition

**Design-to-Code:** Figma, GitHub, HTML/CSS, React / Next.js prototypes (AI-assisted), Playwright + axe-core accessibility QA

## EDUCATION & CERTIFICATE

**University of Science – HCMUS** · Information Technology · 2021–2026

**Claude Bernard University Lyon 1** · Information Technology · 2021–2025

**Foundations of Google UX Design** · Certificate · 2026
